Subject: Discones & Polarization
To: ham-ant@ucsd.edu

In a previous article, francis4@applelink.apple.com (Dexter Wm. Francis) says:

>It is my understanding that discones are circularly polarized. If so,
>how does this affect the reception of non-circularly polarized signals?
>Shouldn't a circularly polarized antenna would do well on any
>linearly polarized signal (horizontal or vertical)???

Silly me, all along I was misleading myself to believe they were verticals,
Silly me.

They are verticals aren't they!

Where can I find a FAQ for this group?

To: ham-ant@ucsd.edu

I was at this surplus electronic junk place, and they
had a big spool of "RG-22" coax cable. I couldn't
tell much about it, except that it seemed to resemble
RG-8. None of my references (ARRL Handbook, Antenna Book, etc.)
mention this type of cable. Anyone ever heard of it?

Thanx in advance,
